

$$y = -1$$

- 1) What is the slope? Is the function increasing, decreasing, or constant?
- 2) What are the y-intercept and x-intercept of the function?
- 3) What is the end behavior of the function?
Left:

Right:

$$x = 2$$

- 1) What is the slope? Is the function increasing, decreasing, or constant?
- 2) What are the y-intercept and x-intercept of the function?
- 3) What is the end behavior of the function?
Left:

Right:
